

New graphical user interface - with the myGUI® you take control!

Safe, self-explanatory, simple – that's how easy the system control in the control room can be summarized with the myGUI® (GUI: Graphical User Interface). Thanks to a new design in the individual 3D layout of your control room, now even more effective in practice test. Intuitive and lightning-fast – with just one click, you can control workstations, large-screen technology, cameras, meeting rooms, lighting, media, air-conditioning and building technology. When operating the myGUI® you have the choice: Mouse or CommandPad, touch gestures or optional voice commands are available.

- **Intuitive:** Designed in the 3D layout of your control room
- **Touch-optimized:** lightning-fast switch-on of all systems with a tap of your finger
- **Clearly arranged:** Only one mouse and one keyboard operate the workstation
- **Safe:** Confident operation in stressful situations
- **Comprehensive:** Operation of workstations, large-format systems, cameras, meeting rooms, media technology and much more
- **Compatible:** No installation on your computers necessary

myGUI

myGUI®: all systems available in seconds

New layout, new flexibility! As a user interface for the real-time control systems MultiConsoling® and JST MultiStreaming®, myGUI® is already used in hundreds of control rooms. The clear, intuitively understandable arrangement of text buttons and source lists – also for the structures of external rooms – guarantees effortless and confident control of all systems in the control room.
