New adaptation of the control room AT

UniCredit Vienna. Control room from JST

The control room in Vienna was newly adapted to implement international incident management processes of UniCredit Business Integrated Solutions Austria GmbH.

UniCredit Business Integrated Solutions Austria is part of UniCredit's new global services company and consists of former companies that were gradually merged into a new company from 2011 to 2012. UniCredit Business Integrated Solutions Austria offers services at the highest level in the areas of IT, business case processing, facility management, security and procurement.

" Jungmann JST Systemtechnik was a reliable partner for us from the planning phase onwards. The installation of the overall solution on schedule worked without any complaints despite a very tight deadline. In the control room, the system of "remote workstations" improved the indoor climate, which is highly appreciated by the employees in 7x24 hour operation".

Gerald Kohlmayer

UniCredit Wien

“The DisplayWall’s fault notification - communicated simultaneously to four teams - improves the resolution time of incidents.”

Johannes Leonhartsberger, Ing.
UniCredit Vienna
