

Client:

Volkswagen Kraftwerk GmbH

Kategorie: Switch room.

With new control center for cross-system and flexible monitoring

Volkswagen power plant: Michael Dudek and Dimitri Vasiliadis at the JST control center

Whether drinking water or heat, electricity or cold water for laser cooling – the threads of the entire energy supply for the Volkswagen site in Wolfsburg come together at the control center of VW Kraftwerk GmbH. After modernisation with future-oriented technology and high-quality furniture from Jungmann Systemtechnik – JST, the various supply facilities on the eight square kilometre site are now conveniently monitored in a new building.

"A good concept and great design – all components are perfectly matched."

Michael Dudek (left) / Dimitri Vasiliadis (right)

Project Manager, VW Kraftwerk GmbH / Head of Energy and Facility Management Wolfsburg

REQUEST AN OFFER WITHOUT OBLIGATION
